Plan A: Standard Data Transfer & Initial Processing

1 SUBMISSION

Employer sends historical data of **workers, sites, and contractors** to BSS via authentic channels.

↓

2 ADMIN REVIEW

BSS Admin reviews and approves/disapproves the data.

↓

3 DATA GOVERNANCE

[If Approved] Data enters the **Data Quarantine environment**.
(Note: This data does not become a part of BSS data assets yet).

↓

4 AUTOMATION

Automated Data Cleaning runs on the quarantined data to standardize formats and flag obvious anomalies.

↓

5 STRUCTURING

BSS Staff review the cleaned data for final structuring and migration to the database (with restrictions).

Plan A: Employer Verification & Worker Onboarding

6 **EMPLOYER REVIEW**
BSS activates a restricted view (analytics/data structure) **only for that specific employer** for approval.

↓

7 **APPROVAL**
Employer approves the data (Verifies authenticity).

↓

8 **ACCOUNT CREATION**
BSS system automatically **creates accounts** for these workers/contractors.

↓

9 **NOTIFICATION**
An introductory **SMS** is sent to the workers/contractors with login details.

↓

10 **DIGITAL ONBOARDING (SMARTPHONE USERS)**
Worker Login (OTP-based) → **Popup 1: Consent** → **Popup 2: Set MPIN** → **Popup 3: Govt Integrations** (Aadhaar, PAN, Bank, ESIC, UDAI, etc.)

Exception Handling: Offline/Assisted Onboarding (No Smartphone)

- BSS staff organize **site-specific camps**.
- Staff assist workers in completing registration, consent, and government integrations.
- **Target Efficiency:** The cycle time per worker is capped at **1 minute maximum**.

Plan B: SAP Integration & Core Principles

1 **ALTERNATIVE ACQUISITION**
Historical data is acquired using a **SAP-based integration**.

↓

2 **DATA GOVERNANCE**
First-time data is stored in the **Data Quarantine environment**. Automated data cleaning runs on this data.

↓

3 **DOWNSTREAM PROCESS**
Once the employer approves, the remainder of the process (BSS Staff structuring, account creation, SMS, OTP login, consent, MPIN, government integrations, and camps) **remains exactly the same as Plan A**.

Core Data Governance Principle

Data in the Quarantine environment does **not** become a part of BSS data assets until two conditions are met:

1. **Employer Approval:** The employer verifies the authenticity of the data.
2. **Worker/Contractor Consent:** Explicit consent is provided by the individuals.
